

## | CargoSoft Sondernewsletter Elektronische Rechnungen 2.0

Sehr geehrter Herr Bieniek,

ab dem 01.01.2025 müssen Unternehmen in der Lage sein, elektronische Rechnungen zu empfangen (*Link auf die gesetzlichen Anforderungen finden Sie [hier](#) - IHK FFM*).

Wir bieten eine einfache Möglichkeit, dieser Verpflichtung vollumfänglich nachzukommen. Um Ihre speditionellen Rechnungen elektronisch in das CargoSoft TMS zu integrieren, haben wir mit CargoSoft E-Invoicing eine passgenaue Lösung entwickelt.

Ihr Vorteil: Sie erfüllen die gesetzlichen Anforderungen und steigen damit in die effizientere, elektronische Rechnungsbearbeitung ein (einfacher empfangen und übernehmen, schneller prüfen und richtig verbuchen).

Später im Jahr 2025 folgt eine Möglichkeit, elektronische Rechnungen gemäß den gesetzlichen Anforderungen direkt aus dem CargoSoft TMS zu versenden.

Wenn Sie ein Angebot oder weitere Informationen wünschen, oder als PILOTKUNDE die Lösung in den nächsten Wochen testen wollen, senden Sie uns gerne eine E-Mail an [sales\(at\)cargosoft.de](mailto:sales(at)cargosoft.de).

**Vielen Dank und herzliche Grüße aus Bremen**  
**Ihr CargoSoft Marketing Team**

PS: Sie haben die erste Ausgabe unseres Newsletters mit den Hintergrundinfos verpasst? Diesen finden Sie [hier](#) nochmal zum Nachlesen.

The first part of the document discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial statements and for providing a clear audit trail. The second part of the document outlines the various methods used to collect and analyze data, including interviews, focus groups, and surveys. The third part of the document describes the results of the study, highlighting the key findings and their implications for practice. The final part of the document discusses the limitations of the study and suggests areas for future research.

The study was conducted in a multi-stage process. In the first stage, a series of interviews were conducted with key informants to explore the current state of practice and to identify the key issues. In the second stage, focus groups were held to explore the views of a wider range of stakeholders. In the third stage, a survey was conducted to collect quantitative data on the prevalence of various practices. The data from the survey were then analyzed using statistical methods to identify trends and patterns. The findings of the study are presented in the following sections.

The first finding is that there is a significant gap between the current state of practice and the best practice identified in the literature. This gap is most pronounced in the area of data collection and analysis, where many organizations are still using outdated methods. The second finding is that there is a strong emphasis on financial performance, with many organizations focusing on short-term results at the expense of long-term sustainability. The third finding is that there is a need for greater transparency and accountability, with many organizations failing to provide adequate information to their stakeholders. The fourth finding is that there is a need for greater collaboration and partnership between organizations and their stakeholders. The fifth finding is that there is a need for greater innovation and creativity, with many organizations failing to embrace new technologies and ideas.

The implications of these findings are significant. First, it is clear that there is a need for organizations to invest in training and development to ensure that their staff are equipped with the skills and knowledge needed to implement best practice. Second, it is clear that there is a need for organizations to focus on long-term sustainability rather than short-term results. Third, it is clear that there is a need for organizations to be more transparent and accountable to their stakeholders. Fourth, it is clear that there is a need for organizations to collaborate and partner with their stakeholders. Fifth, it is clear that there is a need for organizations to be more innovative and creative.

In conclusion, the study has identified a number of key issues and findings that have significant implications for practice. It is clear that there is a need for organizations to invest in training and development, to focus on long-term sustainability, to be more transparent and accountable, to collaborate and partner with their stakeholders, and to be more innovative and creative. These findings provide a clear roadmap for organizations to follow in order to improve their performance and to achieve their long-term goals.
