

CargoSoft User Newsletter | No. 01-2025

Sehr geehrter Herr Bieniek,

Welcome to the CargoSoft user newsletter!

At the beginning of the new year 2025, we have once again compiled some interesting topics and news for you:

- New **OpenTracking function**
- Questions & Answers (**ZAPP** status)
- **ATLAS** - Transition phase in the AES procedure postponed
- **Training courses**, knowledge transfers and events 2025
- Webinar - **ZODIAK GE** - Manage NCTS guarantee account
- **Trade fair LogiMAT 2025**

Please forward this information to your colleagues so that they are also up to date. You can also subscribe to our [newsletter at any time](#).

Your CargoSoft-Team

System-News

We are pleased to introduce the **new OpenTracking function** for CargoSoft TMS & CargoSoft SCM shipments: **A user-friendly search option** available completely without login - similar to the well-known CEP service provider tracking (see DHL, UPS etc.).

Thanks to this new function, your customers can **easily and quickly check the status of their shipments without** having to **log into** the system.

The search is flexibly configurable and allows you to search by relevant criteria such as filenumber or House Bill of Lading (HBL). Important to note: The results displayed do not contain any address information in order to comply with data protection guidelines. Further shipment details are only visible after logging in.

OpenTracking for CargoSoft shipments

This is how it works:

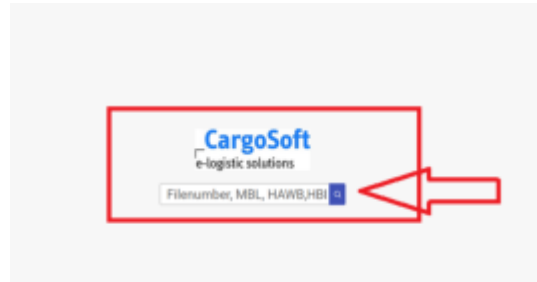

- The search can be accessed directly via the SCM login page.
- Clicking on “Open Tracking” takes users to the search screen.
- Here they enter their search criteria and receive the relevant results directly.
- The search is carried out without a wildcard function, so exact entries are required.

Try it out and experience an optimized user experience!

If you have any questions or require further information, please do not hesitate to contact our sales team. Please feel free to send us an [e-mail](#).

CargoSoft

Q & A's

ZAPP@Status is switched off - What does this mean for CargoSoft users?

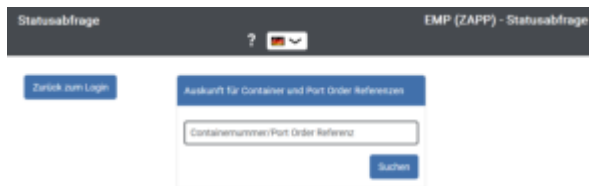

Will be switched off - The ZAPP status information:

The ZAPP@Status information will be replaced by the EMP status query. For you as a CargoSoft TMS user, nothing will change within the TMS and you will be able to carry out your handling operations as usual.

Only if you use the DAKOSY web application with the extended status information ZAPP@Status do you need to take action. This functionality will be switched off at the end of March 2025. DAKOSY has developed a new application that can be used immediately, the status information in the DAKOSY Export Management Platform

NEW - The EMP-status lookup:

([EMP](#)).

How to activate the new service?

Register your company now to use the status information in the EMP.

You will need access, which you will receive directly from DAKOSY. In future, registration will be by user. A key user (administrator) will first be created by DAKOSY. This user can then assign the other logins required.

You will need to provide the following information:

- **Participant code** to be activated in the EMP.
- **First name, surname, work e-mail** address of a person who is to be responsible for user maintenance in the EMP application in your company.

Please send this information to servicedesk@dakosy.de with the subject "Registration EMP status information".

You are also welcome to use the new [EMP public status-query](#) for information on containers and port order references.

If you have any further questions on this topic, please contact [Dakosy per e-mail](#).

Important news about the ATLAS/AES transition phase!

The **end of the transition phase** in the AES procedure was scheduled by ATLAS for 11-Feb-2025.

This date has been postponed to the end of 2025.

Quote ATLAS / ITZ Bund: "With reference to ATLAS-Info 0611/24 of May 6, 2024, which informed about the end of the professional and technical changeover to AES-P1, the postponement of the technical end to the end of 2025 is now announced.

Due to delays in some Member States, the

End of the transition phase in the ATLAS AES procedure postponed

Commission is now granting this deadline extension (as soon as a concrete end date is set, it will be announced).”

[Book now](#)

We invite you to a **free online information event** on how to manage the **NCTS guarantee account in ZODIAK GE** and how to automatically send guarantee bookings to GE via the CargoSoft TMS Atlas module.

When?

- **Date 1: Friday, 14.02.2025 from 10:00 - 11:00 am** (online via MS Teams)
- **Date 2: Friday, 28.02.2025 from 10:00 - 11:00** (online via MS Teams)

Do you have a surety account and use the surety management in ZODIAK Classic?

Then we cordially invite you to take a closer look at the successor version ZODIAK GE and the new possibilities it offers.

Contents:

- Account statements and automated reports
- Create postings manually in GE
- Create automated bookings via shipping requests sent from the CargoSoft TMS Atlas module
- Behavior in case of rejection of an automated booking from the TMS
- Terminate (individual) reservations in GE (credit guarantee account)
- Terminate reservations automatically

You can already register for the event using the button.

The access data for the webinar will be sent to you by e-mail the day before the event.

We look forward to welcoming you to the webinar!
